

Senior Backend Engineer
Northwind Freight — Bristol (hybrid)

ABOUT US

Northwind Freight builds the software that moves goods across Europe. We are a team of 60, about half of us engineers, and we ship to production several times a day.

WHAT YOU'LL DO

- Own backend services for our carrier integration platform end to end.
- Design and evolve PostgreSQL schemas for multi-tenant workloads.
- Work with product to turn vague logistics problems into concrete services.
- Take part in an on-call rotation supported by runbooks the team maintains.

REQUIREMENTS

- 4+ years building production backend services.
- Strong Python or Go. We use both; you do not need both on day one.
- Solid PostgreSQL, including schema design and query tuning.
- Experience with event-driven systems, ideally Kafka.
- Comfortable with Docker and a cloud provider, ideally AWS.
- Experience owning services in production, including on-call.

NICE TO HAVE

- Logistics or supply chain domain experience.
- Contract or consumer-driven testing.
- Experience with database migrations at scale.

BENEFITS

- Competitive salary, reviewed annually.
- 28 days holiday plus bank holidays.
- Private medical cover and a cycle-to-work scheme.
- Four days a year of paid volunteering.
- Hybrid working: two days a week in our Bristol office.

EQUAL OPPORTUNITY

Northwind Freight is an equal opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all employees. We do not discriminate on the basis of race, religion, colour, national origin, gender, sexual orientation, age, marital status, or disability status.
